

# Questions to Ask...

*if you find a lump in your breast*

---

1. Can you refer me to an accredited mammography facility for a mammogram?
2. Can this lump be aspirated (*fluid or cells removed with a needle*)?
3. What about a biopsy? Why? Why not? What type?
4. Can you refer me to a doctor who specializes in breast problems for further tests and/or treatment?
5. Would ultrasound be recommended?
6. What non-cancerous conditions can cause breast lumps?

*∞ Helpful hint: If a waiting period is advised, consider getting a second opinion from a specialist.*
